**Setting Goals: Research projects**

What are the scientific questions that you will be working towards answering in the next year? These may be individual papers (or figures within a single paper) that you aim to publish.

---

---

---

---

What are the experimental approaches that you are currently pursuing? Are there other approaches that you could try? Are there additional, more promising experiments that you should be doing?

---

---

---

---

What professional development activities/opportunities (e.g., training, conferences, special projects, etc.) would you like to pursue during the next review cycle that would enhance your performance and skill development?

---

---

---

What month and year do you hope to finish this stage of your training?
